

Request for Indigenous Engagement on Emergency Management

Project Lead

Public Safety Canada

The Government of Canada is taking a number of steps to advance reconciliation and renew the relationship with First Nations, Métis and Inuit peoples in a number of areas including the portfolio of emergency management.

Indigenous Facilitators and Advisors

Cambium Indigenous Professional Services

With respect to emergency management, it is clear that weather-related natural disasters and emergencies are becoming more severe, frequent, and damaging. Moreover, First Nations, Métis and Inuit communities are more likely to be disproportionately affected by disasters. As a result, the Government of Canada is committed to working with Indigenous peoples to better understand the emergency management risks they face and to develop an emergency management approach that is inclusive and accessible to all Canadians.

In doing so, Public Safety Canada (PS) is seeking to gather Indigenous perspectives on risks and impacts associated with floods, wildfires, and earthquakes and ensure that those perspectives are respectfully captured as part of the National Risk Profile (NRP). PS wishes to ensure that Inuit, Métis and First Nations perspectives are duly incorporated and reflected into future NRP public reports.

Request for First Nation, Métis and Inuit Emergency Management Knowledge Holders:

Engagement Session Information

Public Safety Canada has contracted Cambium Indigenous Professional Services (CIPS) Inc. to engage with First Nations, Métis and Inuit Emergency Management practitioners and knowledge holders from across the country to discuss emergency management risks.
